

# Ductile iron pipe systems

Pipes, fittings and valves of ductile iron pipe systems

## Foreword

The current edition of the Cast Iron Pipes Manual has been updated and is ready for you to download as an E-Book in pdf format. By going to the European Association for Ductile Iron Pipe Systems · EADIPS®/Fachgemeinschaft Guss-Rohrsysteme (FGR®) e. V. website at [www.eadips.org](http://www.eadips.org) you can download the entire book or just individual chapters of it. This offers the numerous advantages of a modern E-Book which you can use interactively for your work. The search engine on the Adobe Reader provides the reader with various ways of searching the pdf for terms and passages of text and having the search results displayed in order with bookmarks.

The date given on the title page of the E-Book is that of the latest edition of the entire book (month and year). The dates given on the left-hand side of the footer on each of the chapter pages (also as month and year) indicate the publication date of the particular chapter. The publication date of a

chapter is relevant for the references to standards and regulations quoted as at this date.

Each chapter is a unit on its own, comparable to a folder on a computer. This means that each chapter can be amended, updated or added to by the publisher independently of the other chapters. It is equally easy for new chapters to be added.

Illustrations such as graphics, photos and tables usually appear close to the relevant content in the text. Videos relating to the subject being discussed are indicated by the symbol  in the text. As long as you have a broadband connection, you can view them by clicking on this symbol in the pdf.

As at the time of going to press, you can order the latest version of the “Ductile iron pipe systems” manual as a perfect-bound booklet by going to [www.eadips.org/e-book/](http://www.eadips.org/e-book/).

European Association for Ductile Iron Pipe Systems · EADIPS®/  
Fachgemeinschaft Guss-Rohrsysteme (FGR®) e. V.

Griesheim, October 2015

## Contents

### Foreword

#### 1 Introduction

- 1.1 General
- 1.2 Cast iron as material for pipes
- 1.3 Joint technology
- 1.4 Modern ductile iron pipe techniques
- 1.5 Sustainability
- 1.6 Summary
- 1.7 References

#### 2 Ductile cast iron as a material

- 2.1 General
- 2.2 Structure
- 2.3 Technological properties
- 2.4 References

#### 3 Production of pipes, fittings and valves

- 3.1 Melting the iron
- 3.2 Magnesium treatment
- 3.3 Casting process
- 3.4 Post-treatment

- 3.5 Application of coatings and linings
- 3.6 Marking
- 3.7 Testing
- 3.8 References

#### 4 Quality management

This chapter is being prepared.

**NEW**

#### 5 Wall thickness calculation for ductile iron pipes

- 5.1 Stresses in pressure pipelines
- 5.2 Calculating the wall thickness of pipes with non-restrained flexible push-in joints
- 5.3 Development of minimum pipe wall thicknesses
- 5.4 Comparison of wall thickness classes (K-classes) and pressure classes (C-classes) for non-restrained flexible pipes
- 5.5 The effect of longitudinal bending strength and ring stiffness on the calculation of pipe wall thickness dimensions
- 5.6 Ductile cast iron pipes with restrained flexible joints
- 5.7 References

#### 6 Design and marking of fittings

This chapter is being prepared.

## **7 Valves**

- 7.1 Valves in spheroidal graphite cast iron
- 7.2 Corrosion protection of valves in spheroidal graphite cast iron
- 7.3 Principles of hydraulics and the design of valves
- 7.4 Isolation valves
- 7.5 Tapping valves
- 7.6 Control valves
- 7.7 Air valves
- 7.8 Hydrants

## **8 Push-in joints**

- 8.1 General
- 8.2 Types of joint
- 8.3 Fields of use
- 8.4 References

## **9 Restrained socket joints**

- 9.1 General
- 9.2 Types of joint
- 9.3 Bases for the design and dimensioning of restrained socket joints
- 9.4 Types of restrained joint
- 9.5 Type tests
- 9.6 Determining the forces which occur and the lengths of pipe to be restrained
- 9.7 Examples of installed pipelines
- 9.8 Notation in equations
- 9.9 References

## **10 Mechanical joints – wide-tolerance couplings and flange adaptors**

- 10.1 General
- 10.2 Construction and operation
- 10.3 Wide-tolerance couplings
- 10.4 Wide-tolerance flange adaptors
- 10.5 Preloading of gasket
- 10.6 Ranges of pipe outside diameters
- 10.7 Allowable angular deflection
- 10.8 Restraint
- 10.9 References

## **11 Safeguarding with concrete thrust blocks**

This chapter is being prepared.

## **12 Durability**

This chapter is being prepared.

## **13 Gaskets**

- 13.1 General
- 13.2 Types of gaskets
- 13.3 Properties
- 13.4 Gaskets for drinking water pipelines
- 13.5 Gaskets for sewage drains and pipelines
- 13.6 References

## **14 Coatings**

- 14.1 General
- 14.2 Works-applied coatings on pipes
- 14.3 Coating of fittings and valves
- 14.4 On-site measures
- 14.5 References

## **15 Linings**

- 15.1 General
- 15.2 Linings of pipes, fittings and valves for drinking water pipelines
- 15.3 Linings in pipelines for raw water
- 15.4 Linings of pipes, fittings and valves for pipelines for wastewater and sewage
- 15.5 Linings in pipelines for non-drinking and cooling water
- 15.6 References

## **16 Structural design**

This chapter is being prepared.

## **17 Hydraulic design**

This chapter is being prepared.

## **18 Welding of ductile iron pipes**

This chapter is being prepared.

## **19 Transport, storage and installation**

- 19.1 General
- 19.2 Pipeline installation regulations
- 19.3 Transport of ductile cast iron pipes, fittings and valves
- 19.4 Installation of ductile iron pipe systems
- 19.5 Installation
- 19.6 Pipe trenches
- 19.7 Special pipeline installation cases
- 19.8 References

## **20 Pressure tests**

This chapter is being prepared.

## **21 Commissioning of ductile iron pipelines for drinking water**

- 21.1 Preliminary comment
- 21.2 Preventive measures
- 21.3 Cleaning measures
- 21.4 Flushing with water
- 21.5 Flushing with water and air
- 21.6 Impulse-flushing method
- 21.7 Other cleaning techniques
- 21.8 Disinfection process
- 21.9 Disinfection agent
- 21.10 Handling and disposal
- 21.11 Inspection and release of the pipeline
- 21.12 Measures for existing cast iron pipelines

- 21.13 Summary
- 21.14 Closing comments, additional information and prospects
- 21.15 References

## **22 Use of ductile iron pipes for trenchless installation techniques**

- 22.1 General
- 22.2 Coatings of ductile iron pipes for trenchless pipe installation
- 22.3 Joint technology
- 22.4 Trenchless installation techniques
- 22.5 References

## **23 Some new main applications for ductile iron pipes**

This chapter is being prepared.

## **24 Standards, directives and technical rules**

- 24.1 General
- 24.2 The Standards Database

## **25 Index**

## **26 Imprint**
